THE SUPER MULTI BLUE ADVANTAGE

Multiple Compatibility

In addition to read and access Blu-ray formats, the CH10LS20 Super Multi optical drive can read and write three types of DVD in one convenient package:

1. DVD+R
2. RW DVD-R
3. RW DVD-RAM

This gives you the option to choose the media best suited for each task.

Serial ATA Technology

Serial ATA is a 1.5Gbps evolutionary replacement for the Parallel ATA physical storage interface used to connect storage devices, such as hard disks, DVD and CD rewriters to the PC motherboard. Serial ATA is scalable, enables design of smaller PCs, and will allow future enhancements to the computing platform.

LightScribe - Direct Disc Labeling

LightScribe gives you the ability to create customized labels that are etched directly onto a special coated LightScribe disc (sold separately).
